

**Our philosophy is to undertake projects with great care, efficiency and enthusiasm.**

As an established consulting engineering firm, with a reputation for providing high quality work to niche markets in the process industries, we are looking for like-minded individuals to help us to continue building our business.

Currently, we are seeking qualified engineers, eligible for PEO registration, to fill the following positions:

**Project Manager** good communication skills, engineering or management background in industrial process work required, pulp and paper experience considered an asset (file 00220)

**Civil/Structural Engineer** with a minimum of three years Canadian experience in the design of steel and reinforced concrete structures for industrial projects. Proficiency in the use of STAAD would be an asset (file 00221)

Please forward your resume in confidence to the Human Resources Manager via fax at 416.391.3133 or e-mail at [hr@dickeng.com](mailto:hr@dickeng.com) and quote the appropriate file number.
